

25 CRUISE-ABILITY

What does Cruise-Ability mean in a 25-footer? It means a 25-footer that is built like a bigger boat, feels like a bigger boat, and acts like a bigger boat. It means ease and comfort in port, and solid, exciting performance in blue water. Just ask our owners!

BIG to sail! Our 25-footer's excellent displacement/length ratio and high ballast/displacement ratio are what make it sail like a 30. The 25's roomy cockpit is a natural fit for optional wheel steering. Wheel or tiller, you'll appreciate the solid feel of a real cruiser.

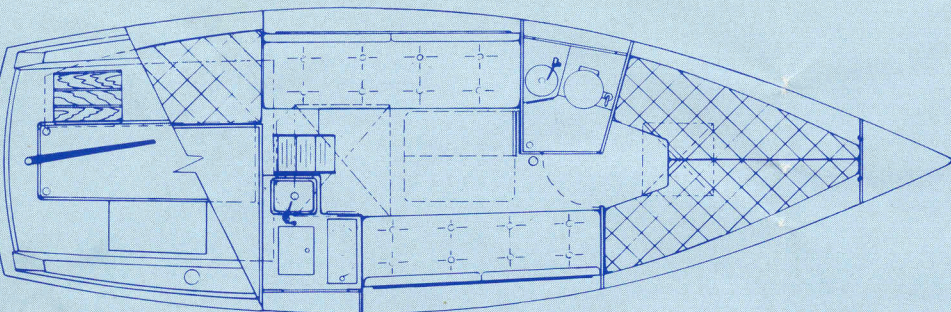

BIG to live in! Below decks, 5'11" standing headroom — extraordinary for a 25 — adds to the spacious surroundings. The 25's roomy interior, with a fully enclosed head, even accommodates a shower, with pressure water system to go with it.

STRONG! Like all our yachts our 25 is "over-engineered." The exterior through-bolted hull-to-deck joint (using stainless steel bolts) is the strongest on the market. Stanchions are through-bolted to the exterior for accessibility and strength.

Our hand-laid, one-piece hull combined with our deck and hull innerliners add stiffness, and result in quiet solidity while insulating you from heat or cold, and reducing condensation. The internal keel is trouble free! Spars and rigging are equally strong.

COMFORTABLE! The below-decks layout makes it easy to move about in comfort, in port or at sea. Beautiful rugged fabrics, teak cabin sole, teak ceiling strips, and brass oil lamp add to the elegance. Our 25 shares with our bigger boats six top-of-the-line aluminum opening ports with screens and aluminum hatches, so you can tailor conditions below to your mood.

Compare our Watkins 25 with any other 25, 26 or 27. Feature for feature, dollar for dollar you'll choose the bigger, stronger, more comfortable Watkins, for it's Cruise-Ability.

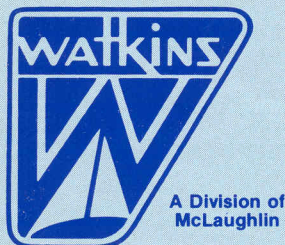

Specifications

LOA	24'11"
DWL	21'0"
Beam	8'0"
Draft	2'6"/4'0"
Displacement	4,800 lbs.
Ballast	1,900 lbs.
Sail Area	265 sq. ft.
Mast Height Above DWL	32'9"
Headroom	5'11"
